## PREFACE TO NEW EDITION.

@ 39481

THE present edition of Leverett's Lexicon will be found to be much improved by the transfer to its columns of the classical distinctions of the words from the Lexicon of Dr. William Freund, of Germany. The classical character of the words is marked by placing a figure directly under the first letter of the word in its column; except that where there is not room for this, the figure is generally inserted at or near the end of the line.

1. A word with no figure under it, is *Classical, and fully Ciceronian*; or else it is a proper name, to which classic laws do not apply.

2. The figure 1, placed under a word, denotes that it is *rare in Cicero*. These words are *Classical*, but not of the first authority; though many of them are peculiar to that writer.

3. The figure 2, placed under a word, denotes that it is *Classical, but not Ciceronian*. The classical prose writers are Cicero, Cæsar, Sallust, Livy, Velleius, Celsus, the two Senecas, Quintilian, Tacitus, Suetonius, Pliny the elder, and Pliny the younger.

4. The figure 3, placed under a word, denotes that it *does not belong to classical prose*. Some of these words are *Ante-Classical*, and some of them are occasionally found in the *Poets*; but most of them are *Post-Classical*, belonging to *Low Latin, Ecclesiastical Latin, Medieval Latin*, and many of them to the *New or Modern Latin*, coined chiefly for the convenience of the sciences.

While transferring the above notes and marks, a catalogue was very carefully made out, of all the words in each Lexicon, which are not found in the other. On comparing these catalogues, it was found that the number of additional words in each Lexicon is nearly equal; the difference being sometimes in favor of the one, and sometimes of the other. But the value and importance of the additional words found in Leverett, so far as a knowledge of the Latin language is concerned, very far exceeds that of those found in Freund; the distinction in favor of the former consisting chiefly in Latin words found in *good*, and often in *classical* writers; and the distinction in favor of the latter consisting chiefly in *New or Modern Latin Scientific Terms, and Proper Names*.

The *Etymological Index*, from the same source as the above, will be found a valuable acquisition.

THE present work was undertaken in the belief that an important want existed, and with the hope of doing something to supply that want. The Latin dictionaries now in common use, whatever may be said of the manner in which they do what they propose to do, are essentially deficient in the plan on which they are executed. It is somewhat remarkable that, for nearly a century past, so little has been done in England towards the systematic lexicography of the Latin tongue. Not that the researches of the learned have been either shallow or fruitless, but that no one has been found to turn them to account. This work by no means pretends to make up the defect, but aims chiefly to present the classical student with the results of the investigations of the most eminent lexicographers, which might otherwise have been inaccessible from an inconvenient form or an unknown language.

The sources from which this Lexicon has been chiefly compiled are, as the title-page sets forth, the great Lexicon of Forcellini and the Latin-German Lexicons of Scheller and his epitomist, Lünemann. Of the faithfulness of the execution of the work, the public will judge; but it may not be amiss to state, in few words, the characteristics of the plan on which it is founded.

The peculiar province of lexicography is, doubtless, the exact definition of words; but considered even thus strictly, it is not wholly independent of many other sources of knowledge. The mere notation of a word, indeed, is an encroachment upon orthography, one of the parts of grammar; and the least attempt to explain a technical term, a trespass upon the particular art to which it may belong. It is vain, then, if it were desirable, to avoid touching, or even entering to some extent into, other apparently distinct departments of knowledge. But there seems to be no valid reason why a dictionary, certainly, of an ancient language, may not in some measure assume the form of an encyclopedia, if fuller illustration of the meaning and use of words is thereby afforded, more especially as such a work must needs fall into the hands of many who are scantily furnished with the means of information upon the auxiliary departments of history, antiquities, &c., not to say grammar. In such a case, the work is better overdone than come tardy off. It is hoped, then, that the occasional detail, which has been indulged in with respect to these accessory matters, so far from being viewed as superfluous, will prove some recommendation of the work. It will be perceived, for instance, that in such words as *castra*, *circus*, and the like, and especially in the names of public officers (as *consul*, *tribunus*, &c.), many things are introduced which, though strictly belonging to the province of antiquities, throw light upon the meaning of the words and their derivatives. It will also be observed that, in accordance with the same principle, much care has been bestowed upon proper names and their derivative adjectives and substantives. This, it is presumed, is none the less important for having been hitherto so much neglected. The vast and imposing mythology of the ancients was admirably adapted for the groundwork of their poetry, and the poets have accordingly built much upon it. It being thus, in a measure, the staple of their works, it is not surprising that passing allusions are made to their mythical gods and heroes, with a frequency which can never be approached in similar cases in any modern language; and that, from the names of these illustrious personages, they have formed various epithets, — as the flexible nature of their languages, especially the Greek, enabled them to do, — which would be utterly unintelligible without some acquaintance with their fabulous traditions. The same remark applies with equal force to those ancient cities and hills, which had become consecrated by so many recollections, that their names were the property of the poet. No one would guess that *Perimedeus* meant *magical*, or that *Titania astra* meant *the sun*, or what *equus Trojanus* would denote in its figurative sense, unless he had some knowledge of the derivation of these words. This holds good also of other similar derivative adjectives. When we find in Catullus *Odissem te odio Vatiniiano*, this is a riddle.

to us, till we learn that Cicero, by his raillery and sarcasm, made his enemy Vatinius the object of such hatred, that *odium Vatinianum* became a by-word. Examples of this kind might be multiplied almost without number. It has not been attempted, of course, to introduce all, or nearly all, the proper names which could be found in the circle of Roman authors, but chiefly such as are of frequent occurrence, or are marked by some peculiarity, which has been the occasion of derivatives being formed from them. The admirable compilations of Forcellini and Scheller have afforded all that was necessary in this respect.

As to the significations of words, it is hoped that, both on the score of exactness and copiousness, the present work will not prove unworthy of regard. The various meanings of the words are generally illustrated by a number of examples, which, in their turn, are also frequently translated. Though here some diversity will be observed in different parts of the work, yet it is believed that, even in those parts least fully illustrated by examples, nothing important has been omitted. The intention has been, in all cases, to give every meaning which a word could be found to bear, and to distinguish, as carefully as might be, its various shades and modifications. Here, too, it will be seen that the *particles* have not been neglected, which, though not usually esteemed of so great moment, are certainly worthy of care and study, as being, if not the bone and sinew, certainly the joints of language. It is hoped, too, that the strong temptation which is offered to form new English words after the Latin, has not often been yielded to, but rather that a large store of good English words and idioms will not be found wanting. Much care has been devoted to the correct interpretation of the names of animals and vegetables; in which point, the dictionary of Lünemann has been of great use.

This work is also intended as a Gradus. The quantity of the syllables, so far as it could be ascertained, has been marked. As a general rule, a vowel before a mute and liquid in the succeeding syllable has been regarded as common, and marked accordingly (◌), when an instance could be found where it was used short, or when its vowel was clearly short by nature. Hence it may have happened that some syllables have received the common mark, which are in actual use only long or short, but which by analogy are common. Thus the word *hydrus* never, perhaps, has the penult actually short; but, as the *v* in ὕδωρ is naturally short, and the *y* in *hydropicus* is found short, it has the common mark. Where so many syllables have been marked, several typographical and other errors must undoubtedly have crept in. It is hoped they are few.

Something remains to be said in relation to the derivation of words. This has been given in those cases where a sure or probable one suggested itself. Some derivations from old Greek roots may appear rather forced, but it should be remembered that the element which is common to the two languages was probably derived from a common stock, and not drawn by one from the other; so that we should expect to find the languages more akin in their roots than in their derived words. Where no satisfactory or probable root could be found, the etymology has been left uncertain.

In the arrangement of the meanings of words, Scheller and Lünemann have generally been more closely followed than Forcellini. They possess a manifest advantage, in a work of this kind and size, in bringing the phrases and idioms, which are given under a word, each into the place which its signification points out, and in incorporating the participles with the verbs to which they belong. It is proper to state, that some portions of the work are nearly a translation of Lünemann.

As to the labor of such a work, no one can form an adequate notion, without having actually been employed upon a similar undertaking. More than two years have elapsed since the preparation, and nearly two since the printing was first commenced. During the whole of this period, at least one, and, for a short time, three persons, besides the editor, were employed at once in preparing the work for the press. Mr. T. G. BRADFORD, well known as a thorough and accurate scholar, prepared a small part of the original copy; Mr. W. PIRSCHER, a German by birth, also a critical and diligent scholar, prepared a still larger portion; and Mr. H. W. TORREY, to whose unwearied industry and critical accuracy a large share of the merit of the work, if any there be, is to be attributed, has devoted much of his time from the very commencement of the undertaking.

**Ā** (*a*), first letter of the alphabet. — ¶ As a numeral letter, it denotes 500; with a dash over it, **Ā**, 5,000. — ¶ *A*. with a period after it, signifies the *prænomen*, as *A. Cæcina, Aulus Cæcina*. — ¶ *A*. sometimes stands for an entire word, as *A. A. A. Auro, Argentum, Ære*. — ¶ *A.*, on the tablets used by judges on trials, stood for *Absolvo, I acquit*, as *C. for Condemno, I condemn*, and *N. L. for Non liquet, It doth not appear*. Hence *A* is called by Cicero *littera salutaris*, and *C. tristis*. *A.*, on the tablets used by the people in assemblies for passing laws, stood for *Antiquo, I reject*, as *U. R. for Uti rogas, As you propose, h. e. I approve*.

**Ā, AB, ABS** (*ἀπό, ἀπ'*), *from*. *A* is used only before words beginning with a consonant; *abs* generally before those beginning with *t* and *q*; *ab* for the most part before vowels, and sometimes before consonants. — ¶ *A* and *ab, by*, with passive and neuter passive verbs, and names of living beings. *Cic.
